Biology and Fertility of Soils

Founded in 1985
by J. C. G. Ottow

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-0727, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for a copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel: 6 13-9 93-92 51; Fax: 6 13-9 52-82 43; e-mail: cisti.docdel@nrc.ca).

Contents of Volume 23 · 1996

Adhya TK, Patnaik P, Rao VR, Sethunathan N: Nitrification of ammonium in different components of a flooded rice soil system 321
Ahlholm U → Silvola J
Ahlsdorf B → Beyer L
Akobundu IO → Sanginga N
Alm J → Silvola J
Anderson AJ → Kropp BR
Appel T, Schneider B, Kosegarten H: Extractability of labelled microbial biomass N by electro-ultrafiltration and $CaCl_2$ extraction 314
Armendáriz I, Arpin P: Nematodes and their relationship to forest dynamics: I. Species and trophic groups 405
Armendáriz I → Arpin P
Arpin P, Armendáriz I: Nematodes and their relationship to forest dynamics: II. Abundance and morphometric variability of Mononchida related to changes in humus forms 414
Arpin P → Armendáriz I
Auerswald K, Weigand S, Kainz M, Philipp C: Influence of soil properties on the population and activity of geophagous earthworms after five years of bare fallow 382
Azam F → Lodhi A

Backman CB → Entry JA
Badalucco L, Kuikman PJ, Nannipieri P: Protease and deaminase activities in wheat rhizosphere and their relation to bacterial and protozoan populations 99
Bashan Y, Dubrovsky JG: *Azospirillum* spp. participation in dry matter partitioning in grasses at the whole plant level 435
Becker M, Ladha JK: Adaptation of green manure legumes to adverse conditions in rice lowlands 243
Belnap J: Soil surface disturbances in cold deserts: effects on nitrogenase activity in cyanobacterial-lichen soil crusts 362
Benckiser G, Eilts R, Linn A, Lorch H-J, Sümer E, Weiske A, Wenzhöfer F: N_2O emissions from different cropping systems and from aerated, nitrifying and denitrifying tanks of a municipal waste water treatment plant 257
Bethlenfalvay GJ → Schreiner RP
Beyer L, Ahlsdorf B, Sorge C, Schulten H-R, Blume H-P: Soil organic matter composition and pesticide bonding in sandy soils in relation to groundwater protection in the Northwest German Lower Plain 266
Blair J → Willems JJGM
Blume H-P → Beyer L
Boddey RM → Garcia de Salamone IE
Bradley RL, Fyles JW: Interactions between tree seedling roots and humus forms in the control of soil C and N cycling 70
Brooks AE → Mawdsley JL
Brussaard L → Vreeken-Buijs MJ
Byzov BA, Claus H, Tretyakova EB, Zvyagintsev DG, Filip Z: Effects of soil invertebrates on the survival of some genetically engineered bacteria in leaf litter and soil 221

Carsky RJ → Sanginga N
Chalk PM, Smith CJ, Hopmans P, Hamilton SD: A yield-independent, ^{15}N-isotope dilution method to estimate legume symbiotic dependence without a non-N_2-fixing reference plant 196
Chalk PM → Sen S
Chang SX, Trofymow JA: Microbial respiration and biomass (substrate-induced respiration) in soils of old-growth and regenerating forests on northern Vancouver Island, British Columbia 145
Claus H → Byzov BA
Constable G → Rochester I

Danso SKA → Sanginga N
DeLuca TH, Drinkwater LE, Wiefling BA, DeNicola DM: Free-living nitrogen-fixing bacteria in temperate cropping systems: influence of nitrogen source 140
DeNicola DM → DeLuca TH
Döbereiner J → Garcia de Salamone IE
Doube BM, Styan C: The response of *Aporrectodea rosea* and *Aporrectodea trapezoides* (Oligochaeta: Lubricidae) to moisture gradients in three soil types in the laboratory 166
Drinkwater LE → DeLuca TH
Dubrovsky JG → Bashan Y

Eilts R → Benckiser G
Entry JA, Mitchell CC, Backman CB: Influence of management practices on soil organic matter, microbial biomass and cotton yield in Alabama's „Old Rotation" 353

Falchini L, Sparvoli E, Tomaselli L: Effect of *Nostoc* (Cyanobacteria) inoculation on the structure and stability of clay soils 346
Fetzner S → Kiemer P
Filip Z → Byzov BA
Foissner W: Terrestrial ciliates (Protozoa, Ciliophora) from two islands (Gough, Marion) in the southern oceans, with description of two new species, *Arcuospathidium cooperi* and *Oxytricha ottowi* 282
Francis K → Shanmughavel P
Fritze H → Vanhala P
Fyles JW → Bradley RL

Galli E → Tomati U
Garcia de Salamone IE, Döbereiner J, Urquiaga S, Boddey RM: Biological nitrogen fixation in *Azospirillum* strain-maize genotype associations as evaluated by the ^{15}N isotope dilution technique 249
Germida JJ, Walley FL: Plant growth-promoting rhizobacteria alter rooting patterns and arbuscular mycorrhizal fungi colonization of field-grown spring wheat 113
Gessa C → Marzadori C
Gioacchini P → Marzadori C
Giraud JJ → Hartmann A
Glover LA → Thorpe IS
Gomez M → Hartmann A
Grigal DF → Homann PS
Groffman PM → Zaady E
Guggenberger G, Haumaier L, Thomas RJ, Zech W: Assessing the organic phosphorus status of an Oxisol under tropical pastures following native savanna using $^{31}PNMR$ spectroscopy 332

Haimi J → Salminen J
Hamilton SD → Chalk PM
Hartmann A, Gomez M, Giraud JJ, Revellin C: Repeated sequence RSα is diagnostic for *Bradyrhizobium japonicum* and *Bradyrhizobium elkanii* 15
Haumaier L → Guggenberger G
Herrick JE, Lal R: Dung decomposition and pedoturbation in a seasonally dry tropical pasture 177
Hodge A: Impact of elevated CO_2 on mycorrhizal associations and implications for plant growth 388
Högberg P → Jonsson K
Homann PS, Grigal DF: Below-ground organic carbon and decomposition potential in a field-forest glacial-outwash landscape 207
Hopmans P → Chalk PM
Horak O → Kandeler E
Hütsch BW, Russell P, Mengel K: CH_4 oxidation in two temperate arable soils as affected by nitrate and ammonium application 86

Inubushi K, Naganuma H, Kitahara S: Contribution of denitrification and autotrophic and heterotrophic nitrification to nitrous oxide production in andosols 292

Jensen ES: Nitrogen acquisition by pea and barley and the effect of their crop residues on available nitrogen for subsequent crops 459
Jiang H-Y → Sato K
Jiang J-Y → Sato K
Joergensen RG, Meyer B, Roden A, Wittke B: Microbial activity and biomass in mixture treatments of soil and biogenic municipal refuse compost 43
Joergensen RG → Lavahun MFE
Jonsson K, Ståhl L, Högberg P: Tree fallows: A comparison between five tropical tree species 50

Kainz M → Auerswald K
Kampichler C → Kandeler E
Kanal A, Kõlli R: Influence of cropping on the content, composition and dynamics of organic residue in the soil of the plough layer 153
Kandeler E, Kampichler C, Horak O: Influence of heavy metals on the functional diversity of soil microbial communities 299
Kiemer P, Tshisuaka B, Fetzner S, Lingens F: Degradation of benzoate via benzoyl-coenzyme A and gentisate by *Bacillus stearothermophilus* PK1, and purification of gentisate 1,2-dioxygenase 307
Killham K → Thorpe IS
Kitahara S → Inubushi K
Kõlli R → Kanal A
Kosegarten H → Appel T
Kostov O, Tzvetkov Y, Petkova G, Lynch JM: Aerobic composting of plant wastes and their effect on the yield of ryegrass and tomatoes 20
Kotova LG → Pomazkina LV
Kropp BR, Thomas E, Pounder JI, Anderson AJ: Increased emergence of spring wheat after inoculation with *Pseudomonas chlororaphis* isolate 2E3 under field and laboratory conditions 200
Kuikman PJ → Badalucco L

Ladha JK → Becker M
Lai KM → Wong JWC
Lal R → Herrick JE
Lange A → Scherer HW
Lavahun MFE, Joergensen RG, Meyer B: Activity and biomass of soil microorganisms at different depths 38
Lingens F → Kiemer P
Linn A → Benckiser G
Lodhi A, Malik NN, Azam F: Growth and nitrogen nutrition of maize (*Zea mays* L.) in soil treated with the nitrification-inhibiting insecticide Baythroid 161
Lorch H-J → Benckiser G
Lubnina EV → Pomazkina LV
Lynch JM → Kostov O

Malik NN → Lodhi A
Marinissen JCY → Willems JJGM
Martikainen PJ → Silvola J
Marzadori C, Vittori Antisari L, Gioacchini P, Gessa C: Influence of spatial root distribution, organic nitrogen mineralization and fertilizer application on soil interlayer ammonium 368
Matumoto S → Motonaga K
Mawdsley JL, Brooks AE, Merry RJ, Pain BF: Use of a novel soil tilting table apparatus to demonstrate the horizontal and vertical movement of the protozoan pathogen *Cryptosporidium parvum* in soil 215
Menéndez L → Pidello A
Mengel K → Hütsch BW
Mengel K → Yan F
Menyah MK, Sato K: A proposal for re-evaluating the most probable number procedure for estimating numbers of *Bradyrhizobium* spp. 110
Menyah MK, Sato K: Survival of inoculant *Bradyrhizobium japonicum* in an Andosol 105
Merckx R → Swerts M
Merry RJ → Mawdsley JL
Meyer B → Joergensen RG
Meyer B → Lavahun MFE
Mitchell CC → Entry JA
Motonaga K, Takagi K, Matumoto S: Biodegradation of chlorothalonil in soil after suppression of degradation 340
Mudrik VA → Shabayev VP

Naganuma H → Inubushi K
Nannipieri P → Badalucco L
Neuvonen S → Vanhala P
Nykänen H → Silvola J

Okogun A → Sanginga N

Pain BF → Mawdsley JL
Pasetti L → Tomati U
Patnaik P → Adhya TK
Perotti EBR → Pidello A
Petkova G → Kostov O
Philipp C → Auerswald K
Pidello A, Menéndez L, Perotti EBR: Saccharidic compounds as soil redox effectors and their influence on potential N_2O production 173
Pomazkina LV, Lubnina EV, Zorina SY, Kotova LG: Dynamics of CO_2 evolution in grey forest soil of the Baikal forest-steppe 327
Pounder JI → Kropp BR
Prosser JI → Thorpe IS

Rao VR → Adhya TK
Razi SS, Sen SP: Amelioration of water stress effects on wetland rice by urea-N, plant growth regulators, and foliar spray of a diazotrophic bacterium *Klebsiella* sp. 454
Revellin C → Hartmann A
Rochester I, Constable G, Saffigna P: Effective nitrification inhibitors may improve fertilizer recovery in irrigated cotton 1
Roden A → Joergensen RG
Russell P → Hütsch BW

Saffigna P → Rochester I
Salminen J, Haimi J: Effects of pentachlorophenol in forest soil: a microcosm experiment for testing ecosystem responses to anthropogenic stress 182
Sanginga N, Danso SKA, Zapata F: Field measurements of nitrogen fixation in leguminous trees used in agroforestry systems: Influence of ^{15}N-labeling approaches and reference trees 26
Sanginga N, Wirkom LE, Okogun A, Akobundu IO, Carsky RJ, Tian G: Nodulation and estimation of symbiotic nitrogen fixation by herbaceous and shrub legumes in Guinea savanna in Nigeria 441
Sato K, Jiang H-Y: Gram-positive bacterial flora on the root surface of wheat (*Triticum aestivum* L.) grown under different soil conditions 121
Sato K, Jiang J-Y: Gram-negative bacterial flora on the root surface of wheat (*Triticum aestivum*) grown under different soil conditions 273
Sato K → Menyah MK
Scherer HW, Lange A: N_2 fixation and growth of legumes as affected by sulphur fertilization 449
Scheu S → Theenhaus A
Schneider B → Appel T
Schreiner RP, Bethlenfalvay GJ: Mycorrhizae, biocides, and biocontrol. 4. Response of a mixed culture of arbuscular mycorrhizal fungi and host plant to three fungicides 189
Schubert S → Yan F
Schulten H-R → Beyer L
Sen S, Chalk PM: Mineralization of soil organic nitrogen solubilized by aqua ammonia fertilizer 93
Sen SP → Razi SS
Sethunathan N → Adhya TK
Shabayev VP, Smolin VYu, Mudrik VA: Nitrogen fixation and CO_2 exchange in soybeans (*Glycine max* L.) inoculated with mixed cultures of different microorganisms 425
Shachak M → Zaady E
Shanmughavel P, Francis K: Biomass and nutrient cycling in bamboo (*Bambusa bambos*) plantations of tropical areas 431
Silvola J, Alm J, Ahlholm U, Nykänen H, Martikainen PJ: The contribution of plant roots to CO_2 fluxes from organic soils 126
Smith CJ → Chalk PM
Smolin VYu → Shabayev VP
Sorge C → Beyer L
Sparvoli E → Falchini L
Ståhl L → Jonsson K
Styan C → Doube BM
Sümer E → Benckiser G
Swerts M, Merckx R, Vlassak K: Denitrification, N_2-fixation and fermentation during anaerobic incubation of soils amended with glucose and nitrate 229

Takagi K → Motonaga K
Theenhaus A, Scheu S: The influence of slug (Arion rufus) mucus and cast material addition on microbial biomass, respiration, and nutrient cycling in beech leaf litter 80
Thomas E → Kropp BR
Thomas RJ → Guggenberger G
Thorpe IS, Prosser JI, Glover LA, Killham K: The role of the earthworm *Lumbricus terrestris* in the transport of bacterial inocula through soil 132
Tian G → Sanginga N
Tomaselli L → Falchini L
Tomati U, Galli E, Pasetti L: Effect of earthworms on molybdenum-depending activities 359

Tretyakova EB → Byzov BA
Trofymow JA → Chang SX
Tshisuaka B → Kiemer P
Tzvetkov Y → Kostov O

Urquiaga S → Garcia de Salamone IE

Vanhala P, Fritze H, Neuvonen S: Prolonged simulated acid rain treatment in the subarctic: Effect on the soil respiration rate and microbial biomass 7
Vittori Antisari L → Marzadori C
Vlassak K → Swerts M
Vreeken-Buijs MJ, Brussaard L: Soil mesofauna dynamics, wheat residue decomposition and nitrogen mineralization in buried litterbags 374

Walley FL → Germida JJ
Warman PR → Whalen JK
Weigand S → Auerswald K
Weiske A → Benckiser G
Wenzhöfer F → Benckiser G
Whalen JK, Warmann PR: Examination of ester sulfates in Podzolic and Regosolic soils using an immobilized arylsulfatase reactor 64
Wiefling BA → DeLuca TH

Protease activity 99
Protozoa 99, 215
Pseudomonads 113
Pseudomonas fluorescens *132, 425*
Pseudomonas *spp. 200*

Redox conditions 173
Repacked soil microcosmos 132
Repeated application 340
Repeated sequence RSα 15
Respiration 399
Rhizobia Nitrogenase 449
Rhizoctonia solani *200*
Rhizodeposition 388
Rhizosphere 121, 273, 321, 435
Rhizosphere effect 99
Rice variety 321
Root-derived respiration 126
Root morphology 388
Roots 207
Root systems 113
Runoff 215

Saccharide sources 173
Seasonal variation 368
Senna siamea *26*
Senna spectabilis *26*
Sesbania *243*
Sewage sludge 420
Shoot-to-root ratio 435
Slug cast material 80
Snails 399
Soil 340
Soil Carbon 353
Soil C balance 33
Soil ciliates 282
Soil communities 182
Soil cores 57
Soil drying 314
Soil enzymes 299
Soil health 353
Soil inoculant 15
Soil inoculation 346
Soil invertebrates 221
Soil matric suction 166
Soil mesofauna 374
Soil microbial biomass 33, 299
Soil Microflora 121
Soil microflora 273
Soil moisture 327
Soil organic C 33, 207
Soil organic matter 38, 64, 153, 266
Soil origin 441
Soil pH 236
Soil phosphorus 332
Soil respiration 7, 70, 126, 327, 382, 420
Soil restoration 177
Soil structure 57, 86, 346
Soil tilting tables 215
Soluble organic N availability 93
Soybean 110
Spatial distribution 368
Spodic horizons 266
Sporulation 189
Spring wheat 113
Sub-Antarctic 282
Subarctic areas 7
Substrate-induced respiration (SIR) 145
Succession 374
Sulphur 449
Survival 105
Sustainable cropping 140
Symbiotic dependence 196
Symbiotic N_2 fixation-labelled N 459
Synthetic pyrethroid 161

Termites 177
Thermophils 307
Transfer routes 215
Tree fallows 50
Tree roots 368
Tree transect 207
Trifolium incarnatum *353*
Triticum aestivum *327*
(Triticum aestivum) *273*
Trophic groups 405
Trophic interactions 374
Tropical pastures 177

Underground phytomass 153
Urea N 454

Vicia faba *L. 236*

Waste 20
Waste water treatment 257
Water stress effects 454
Wetland rice 454
Wheat 121, 200, 273
Wheat straw 382

Yield 20

Zea mays *161, 353*
Zea mays *L. 236, 249*
